

NEW!

CX14

Optimum Weight - Ultimate Strength - Winning Performance

Specifically designed for free-flowing load applications of up to 22 tonnes body & payload

Benefits

A further 60 kg saving against the market leading CX15

Total weight savings of up to 230 kg per load, making it possible to earn up to £1,380 additional annual income

30% faster tipping speeds for increased productivity

Tried and tested to deliver the Edbro "fit & forget" promise

Features

Unique C Series sealing system reduces friction and increases product life

One piece tube technology combined with the highest grade materials ensures the optimum hoist for your application

Large durable contact faces are achieved by laser welding

Large diameter cover tube assembly & special top bolt mounting design

Model code	Nominal truck GVW (tonnes)	Hoist stroke (mm)	Nominal lift capacity (tonnes)	Nominal body length (metres)	Average kit weight incl. oil (kg)
CX14	32	5041	22 - 25	6.5	477

Average kit weight relates to complete hoist kit including PTO/pump
Actual weights vary according to installation

Calculate Your Savings

With a potential weight saving of up to 230 kg per load, the Edbro CX14 increases long-term profitability. See for yourself how much extra profit you could make with our simple weight saving calculation:

Weight saving of 0.230 tonnes x 5 loads per day = 1.15 tonnes extra payload per day

1.15 tonnes extra payload per day x 5 days worked per week = 5.75 tonnes extra payload per week

5.75 tonnes extra payload per week x 48 weeks worked per year = 276 tonnes extra payload per year

276 tonnes extra payload per year x £5 rate per tonne = £1,380 additional income per year

£1,380 additional income per year x 6 year life of chassis = £8,280 additional income during chassis life

Increase profits by £8,280 with the Edbro CX Series

Based on a saving of 230 kg on the CX14 model in the CX Series - actual savings vary according to application.
