

Edbro

CB Series

Specially designed cylinders for
heavy duty tanker tipper applications

CB Series

Benefits

Maximised payload and profits with increased lift capacity and side load resistance.

The fastest tipping speeds on the market for optimum site turnaround times.

No down-time worries with the ultimate reliability of an Edbro fit and forget product.

Model code	Lift Capacity (tonne)	Maximum stroke capacity (mm)
CB11-3	21-37	4015
CB11-4	18-34	4602
CB13	24-44	4761
CB15	35-53	5938

Features

Unique one-piece tube construction and laser welding techniques increase the Edbro weight advantage.

Increased stop contact faces allow for faster tipping.

Double acting final stage to help lower tankers with heavy doors.

Engineering Excellence

At Edbro we offer unrivalled application engineering support and in-depth product knowledge that only comes from decades of industry experience.

Our highly skilled engineers can offer the optimum product for your application to maximise operating payload and ensure ultimate safety in operation.

Extensive research combined with testing in the most arduous environments ensures the best on the market for reliability and performance in any situation.
